Gardening and Health Tips

Today I watched a short video exposing viewers to an alternate way of getting a banana tree started. Always heard that there is more than one way to skin a cat. So here goes: obtain a green banana, cut it at the neck green banana, rub the exposed part of the neck with garlic and stick the neck up to about an inch into a pot of soil, then pour water on the implant. Some days later excavate the banana from the potted soil and you will discover root growing. Transplant to your garden and in fifteen days the banana plant will appear. First the blade and then the tree then the banana. Try it you will like it. It is my understanding, the banana needs to be full, and just about to ripe but still hard green to maximize its potential. This will not work with seedless imported bananas.

POWERFUL PRAYERS

- 8** O God, that You would slay the wicked—
- 9** away from me, you bloodthirsty men—
- 10** who speak of You deceitfully;
- 11** Your enemies take Your name in vain.
- 12** Do I not hate those who hate You, O LORD,
- 13** and detest those who rise against You?
- 14** I hate them with perfect hatred;
- 15** I count them as my enemies.
- 16** Search me, O God, and know my heart;
- 17** test me and know my concerns.
- 18** See if there is any offensive way in me;
- 19** lead me in the way everlasting.

Fundamentals of Education

True education is well defined as the harmonious development of all the faculties-a full and adequate preparation for this life and the future eternal life. It is in the early years in the home and in the formal school work that the mind develops. A pattern of living is established, and character formed. **Ed. 7.3**
